

## Amendments to the List of Hawaiian Staphylinidae (Coleoptera)

IAN MOORE

DIVISION OF BIOLOGICAL CONTROL,  
UNIVERSITY OF CALIFORNIA, RIVERSIDE, 92502

Members of the Oxytelini which were included in my list (Moore 1975) of some Hawaiian Staphylinidae were sent to Dr. P. M. Hammond of the British Museum of Natural History for identification. The following is a report on them. The old genus *Oxytelus* has been divided which accounts for some differences in generic assignment. The numbers correspond to those of my list.

4. *Anotylus nitidifrons* (Wollaston). This was given in my list as *Oxytelus advenus* Sharp. Palolo, Oahu, 2-28-20, O. H. Swezey; Oahu, 12-2-55, light trap, J. W. Beardsley.
5. *Anotylus vinsoni* (Cameron). Ewa, Oahu, 4-1-63, light trap, J. W. Beardsley; Waipio, Oahu, 12-2-55, light trap, J. W. Beardsley.
6. *Anotylus pygmaeus* (Kraatz). Oahu, 12-2-55, light trap, J. W. Beardsley.
7. & 8. *Oxytelus incissus* Motschulsky. Waimanalo, Oahu, 6-60, cow manure, D. B. Habeck; Oahu, 10-1-62, 12-2-55, light trap, J. W. Beardsley; Waipio, Oahu, 12-2-55, light trap, J. W. Beardsley; Kahala, Oahu, 10-17-47, poultry manure, Y. Tanada.
9. *Platystethus americanus* Erichson. Olinda, Maui, 8-1926, F. Muir; Kaunakakai, Molokai, 8-6-1926, O. H. Swezey.

These species were probably all accidentally introduced by commerce.
